- DOM

- Node JS
- Redis
- Sequelize
- Axios
- CI 3
- Mysql

Progamming Language
- Javascript
- PHP

Recent Work

Telepati

Telepati offers free, feature-rich conference meetings using a VPS server with one core, including options like Google login, camera controls, muting, chat, screen sharing, URL copying, recording, and real-time voice recognition. Designed with a responsive layout, Telepati ensures a seamless experience on both desktop and Android mobile devices. Demo| Detail.
Tech Stack : NodeJS, Express JS, GoogleAuth, Socket.IO, Bootstrap, Mediasoup, 3rd API

Telepati APK

Android app for Telepati that offers the same core features as the web version, including camera controls, microphone muting, chat, screen sharing, and URL copying. However, the Android app does not include recording or admin functions, providing a streamlined experience for mobile users. Download.
Tech Stack : React Native, NodeJS, Socket.IO, Bootstrap, Mediasoup, 3rd API

GKI Kayu Putih

Developed a robust administrative system for superadmins using PHP and CodeIgniter 3, with MySQL for database management. This platform streamlines event creation, member management, family registration, reporting, and PDF data export, enhancing the efficiency of church activity organization. Detail.
Tech Stack : CI 3, PHP, Bootstrap and Mysql

Tynker

A mobile app designed for kids' learning with interactive pictures and graphics Detail.
Tech Stack : React Native, Expo, Voice Recognition, Express, NodeJS, Sequelize, AWS, Docker, Nodemailer, PostgreSQL
